

chemical reactions and enzymes pdf

Introduction to Enzymes The following has been excerpted from a very popular Worthington publication which was originally published in 1972 as the Manual of Clinical Enzyme Measurements.

Introduction to Enzymes - Worthington Biochemical

Enzymes / ɛˈnʒaɪmz / are macromolecular biological catalysts. Enzymes accelerate chemical reactions. The molecules upon which enzymes may act are called substrates and the enzyme converts the substrates into different molecules known as products. Almost all metabolic processes in the cell need enzyme catalysis in order to occur at rates fast enough to sustain life.

Enzyme - Wikipedia

Historical introduction. The concept of chemical equilibrium was developed after Berthollet (1803) found that some chemical reactions are reversible. For any reaction mixture to exist at equilibrium, the rates of the forward and backward (reverse) reactions are equal. In the following chemical equation with arrows pointing both ways to indicate equilibrium, A and B are reactant chemical ...

ENZYMES

Proteins that function as biological catalysts are called enzymes. Enzymes speed up specific metabolic reactions. Low contamination, low temperature and fast metabolism are only possible with enzymes.
