Elementary Differential Equations and Boundary Value

Sturm-Liouville theory is a theory of a special type of second order linear ordinary differential equations. Their solutions are based on eigenvalues and corresponding eigenfunctions of linear operators defined in terms of second-order homogeneous linear equations.

Ordinary differential equation - Wikipedia

Definition. Given a simply connected and open subset D of \mathbb{R}^2 and two functions I and J which are continuous on D then an implicit first-order ordinary differential equation of the form $M(x, y) + N(x, y)y' = 0$, is called an exact differential equation if there exists a continuously differentiable function F , called the potential function, so that $F_x = M$ and $F_y = N$. The nomenclature of "exact ...

Exact differential equation - Wikipedia

A one semester first course on differential equations, aimed at engineering students. Prerequisite for the course is the basic calculus sequence.
