3. Energy Management and Audit As per the Energy Conservation Act, 2001, Energy Audit is defined as “the verification, monitoring and analysis of use of energy including submission of technical report containing recommendations for improving energy efficiency with cost benefit analysis and an action plan to reduce energy consumption”.

## **3. ENERGY MANAGEMENT AND AUDIT**

Energy management system The term energy management system encompasses the organizational and information structures, including the required technical tools (e.g. hardware and software) needed to implement energy management. In the stricter sense, it is a technical system for gathering, analyzing, documenting, and visualiz-

## **Energy Management and Energy Optimization in the Process**

Energy management practices may vary from simple maintenance and operational activities that ensure equipment and systems use energy efficiently and effectively, to capital intensive installation of new, more efficient technology.
