An enterprise service bus (ESB) implements a communication system between mutually interacting software applications in a service-oriented architecture (SOA). It implements a software architecture as depicted in the picture. As it implements a distributed computing architecture, it implements a special variant of the more general client-server model, wherein, in general, any application using ...

Last Updated: Survey of Architecture Frameworks. The specification of architecture frameworks is one area of standardization in ISO/IEC/IEEE 42010:2011 (the international revision of IEEE 1471:2000).. WG42 is collecting examples of architecture frameworks, listed below. Items in grey are entries in progress and should not be considered definitive at this time.

Once you have use cases and user stories, programming development moves on to a broader perspective. You need to get an idea of the most important functions of your application. Creating a conceptual model helps you see the most critical elements and how they interact with each other. Watch this online video to learn how to draw a usable conceptual model for your application.
