Learn about conservation of energy with a skater dude! Build tracks, ramps and jumps for the skater and view the kinetic energy, potential energy and friction as he moves. You can also take the skater to different planets or even space!

### **Energy Skate Park - Energy | Conservation of Energy**

A kinetic energy recovery system (often known simply as KERS) is an automotive system for recovering a moving vehicle's kinetic energy under braking. The recovered energy is stored in a reservoir (for example a flywheel or high voltage batteries) for later use under acceleration. Examples include complex high end systems such as the Zytec, Flybrid, Torotrak and Xtrac used in Formula One racing ...

In astroparticle physics, an ultra-high-energy cosmic ray (UHECR) is a cosmic ray particle with a kinetic energy greater than  $10^{18}$  eV, far beyond both the rest mass and energies typical of other cosmic ray particles.. An extreme-energy cosmic ray (EECR) is an UHECR with energy exceeding  $5 \times 10^{19}$  eV (about 8 joule), the so-called Greisen-Zatsepin-Kuzmin limit (GZK limit).

Next misconception, wouldn't lasers dominate the battle space? Lasers do not suffer from many of the inaccuracy problems that projectile weapons do, and move at the speed of light, so they are literally impossible to dodge. So lasers are the king of the battle space, right?
