Environmental Science Core. Note: The following courses are identical to those in the Environmental Science Core for the Natural Science specialization except that the graduate version of dual listed courses is listed when available.

### **Environmental Science - Undergraduate Catalog - University**

A geographic information system (GIS) is a system designed to capture, store, manipulate, analyze, manage, and present spatial or geographic data. GIS applications are tools that allow users to create interactive queries (user-created searches), analyze spatial information, edit data in maps, and present the results of all these operations.
