The rise of service-dominant business. Many business domains are currently transitioning towards a service-oriented business setting [10]. Before the transition, business settings used to be centered on the delivery of products.

### **Achieving Business Process Agility through Service**

In Marxist philosophy, the term dominant ideology denotes the attitudes, beliefs, values, and morals shared by the majority of the people in a given society. As a mechanism of social control, the dominant ideology frames how the majority of the population thinks about the nature of society, their place in society, and their connection to a social class.

Mathematical logic is a subfield of mathematics exploring the applications of formal logic to mathematics. It bears close connections to metamathematics, the foundations of mathematics, and theoretical computer science. The unifying themes in mathematical logic include the study of the expressive power of formal systems and the deductive power of formal proof systems.
